Senior Living Solutions

Quick Response® Plus Wireless Call Solution

RFTECHNOLOGIES®

When your residents need assistance,
you want them to have the assurance and confidence that help is on the way.
Rely on the Quick Response® Plus Wireless Call Solution to create a secure,
home-like environment with improved resident safety and reduced liability.

Increase resident mobility and confidence:
Pendants can work indoors and outdoors

A Reliable & Feature-Rich Safety Solution

The Quick Response® Plus Wireless Call Solution gives residents peace of mind that they can call for help with the push of a button or the pull of a cord.

- Easy-to-use software enhances staff efficiency and person-centered care
- Discreet, aesthetically pleasing wireless call devices help create a secure, home-like environment
- Pendants promote mobility; coverage extends outdoors for safety in gardens, courtyards, patios and walking paths

Designed to Meet Your Community's Needs

Our scalable solutions offer communities a cost-effective way to implement a wireless call solution.

- Custom-designed solution is tailored to support workflow
- Systems are expandable to meet your needs for years to come
- Flexible alerting options and escalation paths improve caregiver response times
- Smart ID™ technology provides room- or area-level locationing
- UL 2560 certification ensures quality, safety and performance for your residents and staff

Increase Resident Confidence with Multiple Call Options

Discreet call devices blend into the community and enable residents to call for assistance from anywhere.

- **Pendant:** Pendants are worn around the neck, strapped to the wrist or hooked on clothing
- **Pull Cord Call Station:** Stationary call device is frequently used in restrooms and common areas
- **Push Button Call Station:** Stationary call station summons help with the push of a button
- **Call Cord:** Residents can call for assistance from their bedside

The added plus of a reliable wireless call solution

with multiple call options. Discreet devices blend into a community and enable residents to call for assistance from anywhere.

Pendant & Wristband

Worn as a necklace, wristband, lanyard, or on a belt clip; light blinks to show a call was received

Repeaters & Network Coordinator

Wireless calls (signals) are sent through Repeaters, to the Network Coordinator, to the Central Server

Paging System

Instant alarm notification to mobile staff via pagers

Cell & VoIP Phones

Instant alarm notifications are sent to mobile staff using cell and voice over IP (VoIP) phones

Control Station

Easy-to-use software is accessible through a touchscreen monitor

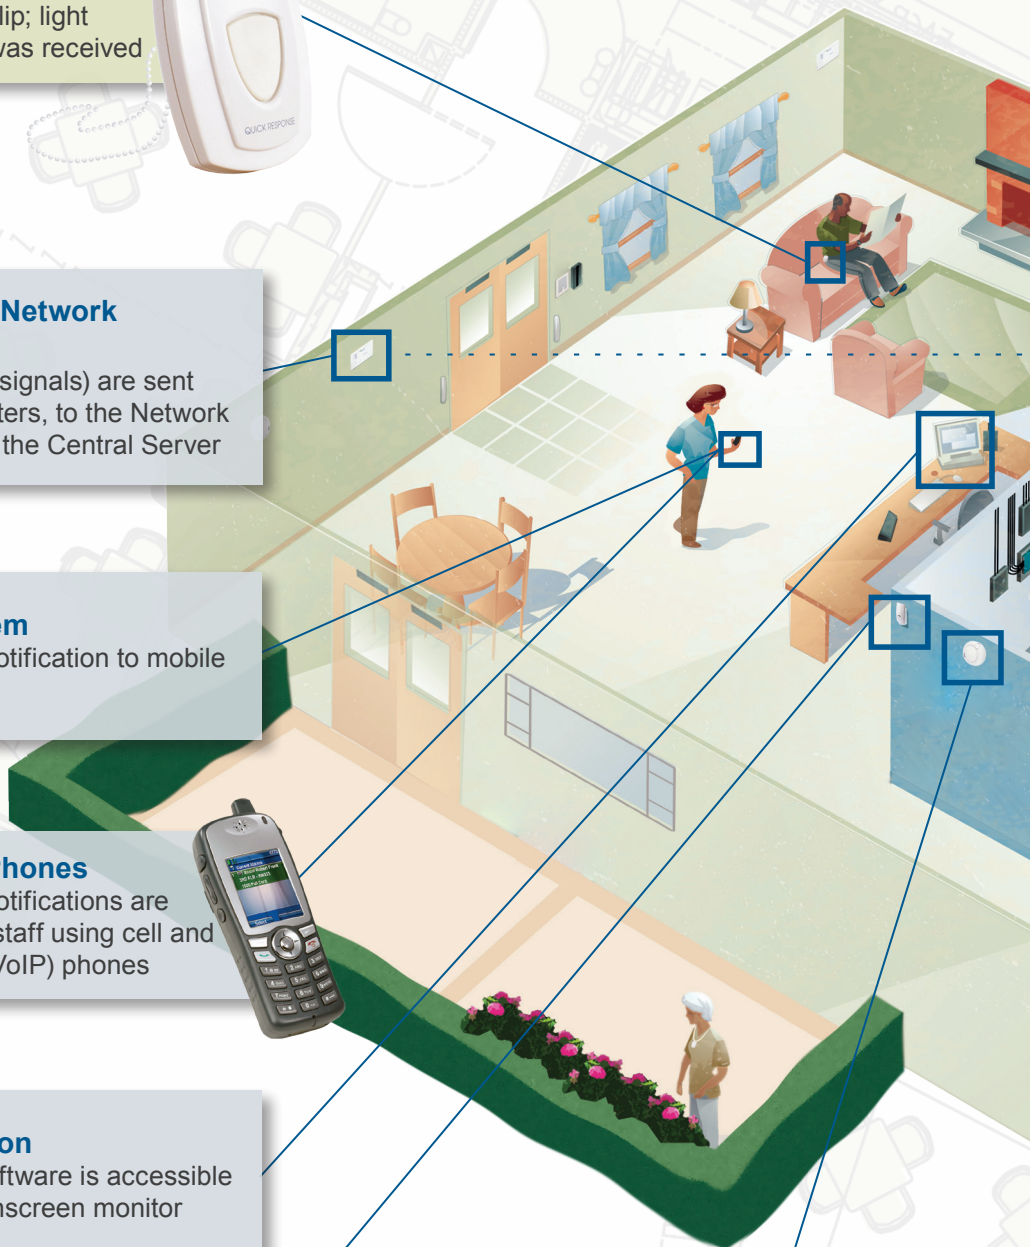

Motion Detector

Detects motion in a room or hallway

Smoke Detector

Integrates into call system for additional smoke alarm notification

Pull Cord Call Station

Stationary, low-profile call device for rest rooms and common areas; LED confirms a call was placed

Nurse Cord Call Station

Works with nurse call cords residents use from their beds; LED confirms a call was placed; device also alarms on cord removal

Fall Management

Reduce risk of falls; integrates with call system for a local, silent alarm

Push Button Call Station

Stationary, low-profile call device; push button to call for help; LED confirms a call was placed

Door/Window Monitor

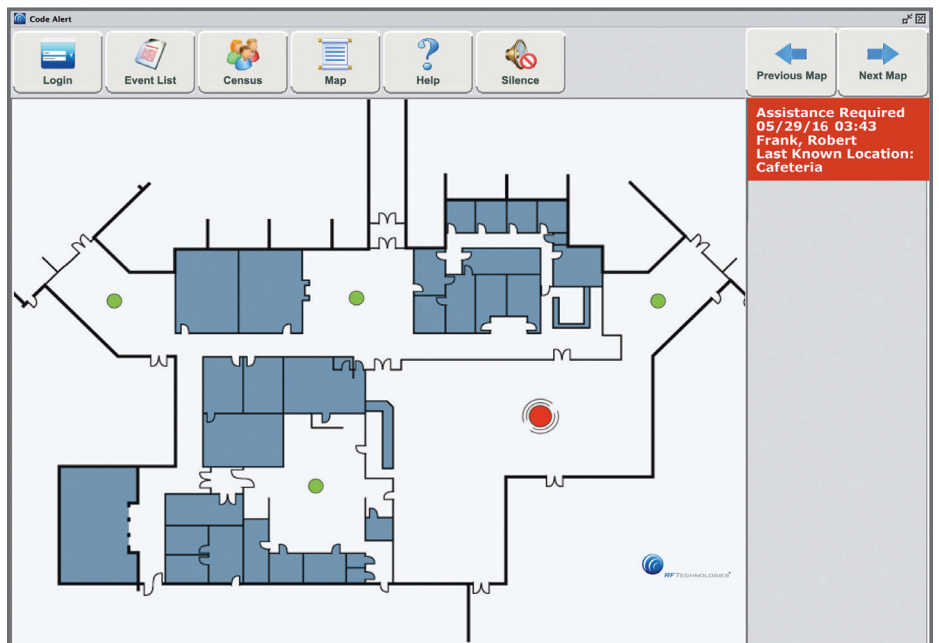

Triggers wireless alert when an unauthorized door/window is open

Dome Light

Meets state requirements for visual notification when a call device is activated

Quick Look™ Display

Discreet LED display shows room number, resident name and event type

Resident Safety (clockwise from left): Call devices provide coverage outside and in common areas; Touchscreen computers help quickly classify alarms; Software maps show a resident's location when a pendant is activated.

Smart ID™ Location Detection

Smart ID identifies a resident and their location when they push their pendant button, ensuring a fast response.

- The resident's name, room number and location are sent to a central computer station
- Room- or area-level locationing can be configured based on community and workflow
- Staff can be notified with a variety of mobile options
- Helps caregivers respond quickly and provides a sense of security to residents and their families

Alarm Notification for All Staff

Caregivers can receive alerts at a central computer station and a wide range of mobile devices. Escalation paths ensure every call gets a timely response, while silent notification options support a home-like environment.

- RFT Cares™ app allows staff to seamlessly receive, acknowledge and classify alarms
- Pagers and Quick Look™ displays provide immediate alerts
- Walkie-talkies and phone systems enable efficient staff-to-staff communication
- Corridor dome lights meet state requirements for visual notification

Capture and Analyze Data with Software Reporting

Data from resident calls, caregiver response times and care time are captured and stored within the Code Alert software. Reports can be automated or printed on demand

- Reporting improves decision-making, including staffing and training allocations
- Track caregiver performance for continuous improvement
- ADL trending enhances custom care planning and communication with family
- Care reporting supports points-based billing

Create a Comprehensive, Integrated Safety Solution

The Quick Response® Plus Wireless Call Solution integrates with our other senior living solutions, helping you save on equipment costs and improve workflow by using the same server and notification devices.

- The restraint-free Code Alert® Wander Management Solution uses small, lightweight transmitters to monitor residents at risk of elopement while promoting mobility

- The Sensatec® Fall Management Solution integrates with Quick Response® Wireless Call Solutions to send an alert when a resident attempts to leave a bed or chair, reducing risk by alerting of a potential fall

Expert, In-house Service

You'll receive a complete suite of support services, available in-house from the experts in resident safety.

- Nationwide service teams deliver prompt, onsite support for peak performance
- Service agreements minimize unbudgeted expenses
- 24/7 technical support

"UL 2560 certification ensures quality, safety and performance for your residents and staff."

Since 1987, RF Technologies has designed and delivered customizable, wireless safety and security solutions for the healthcare industry.
