Senior Living Solutions

Quick Response® Premiere Wireless Call Solution

RFTECHNOLOGIES®

When your residents need assistance,

you want them to have the assurance and confidence that help is on the way with the touch of a button or the pull of a cord. Create a secure, home-like environment with improved resident safety and reduced liability.

Increase resident mobility:
pendants can work indoors and outdoors

Ensure Calls for Assistance Are Heard – Every Time

The Quick Response® Premiere Wireless Call Solution enables residents to immediately call for assistance from anywhere in their community – inside and outside.

- Discreet call devices promote a home-like environment and are proven to work, time after time
- Solutions are customizable and expandable, from a single wing to community-wide protection
- Features room-level locationing when required for a more efficient response to calls

- Provides resident mobility: coverage extends outdoors for safety in courtyards, patios, walking paths and garages
- Software reporting encourages targeted care and tracks response times
- Certified to the UL 1069 Standard for Hospital Signaling and Nurse Call Equipment

Increase Resident Confidence with Multiple Call Options

Low-profile call device options blend into a community and enable residents to call for assistance from anywhere.

- **Pendant:** worn on a breakaway necklace, wristband, lanyard or belt clip; includes visual notification that a call has been received
- **Pull Cord:** stationary call device for restrooms and common areas; daily resident “check-in” button optional
- **Push Button:** stationary call device summons help with the push of a button
- **Call Cord:** residents can call for assistance from their bedside

Give your residents more confidence and greater mobility

with multiple call options. Low-profile device options blend into a community and enable residents to call for assistance from anywhere.

Pendant
Worn as a necklace or on a belt clip; light blinks to show that a call has been received; water-resistant for safety in the shower

Router & Gateway
Wireless calls (signals) are sent through Routers, to the Gateway, to the Central Server

Paging System
Instant alarm notification to mobile staff via pagers

Cell & VoIP Phones
Instant alarm notifications are sent to mobile staff using cell and voice over IP (VoIP) phones

Control Station
Easy-to-use software is accessible through a touch-screen monitor

Motion Detector
Detects motion in a room or hallway

Smoke Detector
Integrates into call system for additional smoke alarm notification

Pull Cord
Stationary call device for restrooms and common areas; "check-in" button available

Call Cord
Residents can call for assistance from their bedside

Wireless Fall Management
Bed and chair alarms reduce risk of falls; integrates with call system for optional silent, local alarm

Push Button
Stationary call device summons help with the push of a button

Door/Window Monitor
Triggers wireless alert when an unauthorized door/window is open

Dome Light
Meets state requirements for visual notification when a call device is activated

Quick Look™ Display
Discreet LED display shows room number, resident name and event type

“When people agree to live here, they trust us to not only be caregivers but also emergency service providers. When the residents are all that matters, [we] can count on the system to work. ”

— Sam Truby, Director of Plant Operations, Sunrise Senior Living

Alarm Notification for All Staff

Caregivers can receive resident call alerts at a central computer station or a variety of mobile devices to improve response times to calls.

- Email or text message alerts on cell phones
- Quick Look™ LED displays, pagers and phone systems immediately display events from anywhere in a community
- Alarms can be configured to escalate to additional staff if a call is unanswered, ensuring every call gets a response

Efficient Room-level Resident Locationing

When residents press the button on their wireless pendant, their location is displayed with detail down to the room-level.

Caregivers know the exact location of the resident and can respond faster, providing a greater sense of security for your residents.

Control stations display the resident's location on a map of your community. The location is also included with alerts sent to other notification devices.

Analyze and Save with Software Reporting

Data from resident calls, caregiver response time and care time are captured and stored within Code Alert software to help you get the most out of your Quick Response system.

- Complete collection, analysis, and reporting of all event data help plan for future events, target care and monitor caregiver performance
- Evaluate data on specific residents to spot trends, review call history and improve staff efficiency

Reliable Operation and Peace of Mind for Residents and Their Families

Proven. Tested. Certified.

The Quick Response® Premiere Wireless Call Solution is fully certified and fully conforms to the UL 1069, Edition 7 Standard for Hospital Signaling and Nurse Call Equipment.

Assurance of Dependable Performance

- Self-healing network sends call until it is received
- System yellow alarms alert of device failure or low battery

Compliance to this UL 1069 standard is mandatory for skilled nursing communities in many states and helps ensure continuous, reliable operation:

- Signaling and receiving operation tested more than 100,000 times
- Long product lifetimes for overall cost savings
- High durability with tested impact and vibration resistance
- Safety and performance in high humidity and oxygen-rich environments

Quick Response Premiere was third party tested by Intertek Testing Services, Inc., the world's largest tester of consumer goods.

Create a Comprehensive, Integrated Safety Solution

An integrated senior living solution combines dependable solutions with expansive system functionality and services.

- The restraint-free Code Alert® Wandering Management system uses small, lightweight transmitters to monitor residents at risk of elopement and promote mobility
- The CA630 Wireless Fall Management Solution integrates with the Quick Response® Premiere Wireless Call Solution to send an alert when a resident attempts to leave a bed or chair, or needs help, reducing risk

Expert, In-house Service

You'll receive a complete suite of support services, available in-house from our experts in resident safety.

- Nationwide service teams deliver prompt, onsite support for peak performance
- Service agreements minimize unbudgeted expenses
- 24/7 technical support

Since 1987, RF Technologies has designed and delivered customizable, wireless safety and security solutions for the healthcare industry.
